Global Engineering Engagement spring conference

Engineering your global experiences: Building global competencies
for the future engineering workforce

The Center for Global Engineering Engagement (GEE) at Penn State invites you to submit panel discussion proposals and student video contest submissions ahead of its virtual spring 2021 conference, **Engineering your global experiences: Building global competencies for the future engineering workforce**.

Conference details

- Thursday, April 1, 2021
- Virtual, student-centered conference to facilitate collaboration across international boundaries and intercultural perspectives
- Includes a keynote speaker, networking opportunities, workshops, and panel discussions
- [Register to attend by March 19.](#) Registration is required even if participants submit a proposal or video.

Panel discussion proposals

GEE invites proposals for panel sessions from staff, faculty, and undergraduate and graduate students that address at least one of the questions in the conference subthemes: (1) Building global competencies in engineering students, (2) Diverse perspectives for engineering effective solutions, and (3) Engineering for humanity. Please note:

- Presentation teams that include students will be given priority for selection.
- Presentations teams may include representatives of more than one institution for collaborative projects.
- Students representing engineering student organizations and leadership positions are especially encouraged to submit.
- Session presentations will be 30-40 minutes in length with an additional 20-30 minutes for questions and discussion.
- Ready to share your idea? [Submit proposals here by Feb. 15.](#)

Student video contest: Engineering impact on the world

Student participants also are invited to submit a video presentation, in the style of a TED talk, of no more than five minutes in length, that addresses the following question: What have you learned from your international and intercultural experiences that will help you to engineer solutions to humanity's greatest challenges?
